

# Carolina Tropini, Ph.D.

Life Sciences Centre  
2350 Health Sciences Mall, Vancouver, BC, V6T 1Z3, Canada

carolina.tropini@ubc.ca +1 650 384 5282 carolina.tropini.org

## Academic Appointment

---

**Assistant Professor - University of British Columbia, BC, Canada**

*School of Biomedical Engineering and Department of Microbiology and Immunology*

## Education

---

**Stanford University**

*Ph.D. Biophysics. GPA: 3.9/4*

Doctoral dissertation: On growth and form: a bacterial perspective.

Committee: Prof. KC Huang (Advisor), Prof. Daniel Fisher, Prof. Julie Theriot, Prof. Stephen Quake.

**Stanford, CA, USA**

*2008–2014*

**University of British Columbia (UBC)**

*B.Sc., Honors Biophysics. GPA: 3.8/4.0, Science One Program*

**Vancouver, BC, Canada**

*2003–2008*

## Research Experience

---

○ **Sonnenburg Lab, Microbiology and Immunology Department, Stanford University. (2014 - )**

Created a framework to investigate the effects of physical perturbations on the gut microbiota. Currently investigating osmotic diarrhea using a combination of omics, imaging, mathematical modeling and microfluidic technologies, mouse and in vitro models. Demonstrated diarrhea causes lasting changes to the gut microbiota and selects microbial taxa based on their metabolic capabilities and osmotic tolerance.

○ **Marine Biological Laboratory Physiology Course, Jonathon Howard Group, Woods Hole. (2011)**

Developed a novel assay to investigate stochastic transition between microtubule shrinking and growing phases. The project led to the shortest time to publication project to come out of the Physiology course.

○ **Huang Lab, Bioengineering Department, Stanford University. (2010 - 2014)**

Investigated how shape is determined in Gram-negative bacteria. Used genetic and biophysical approaches to modify cell wall building blocks and forces; observed with microscopy how bacterial shape and cellular mechanical properties are affected.

Investigated the establishment and function of protein localization in bacteria using a combination of mathematical modeling and time-lapse microscopy. Demonstrated that localized protein activity can give rise to gradients of cellular components that are robust to cell shape changes and cellular regulation.

○ **Hansen Lab, UBC Proteomics, UBC. (2006 - 2008)**

Applied microfabrication and soft lithography techniques to develop, construct, and test a microfluidic device capable of a million parallel digital PCR reactions in picoliter reactors for non-invasive detection of fetal Down syndrome.

○ **Stanford Genome Technology Center, Stanford University. (May - August 2006)**

Provided instruction to the Ronaghi group on organic nanopore analysis. Designed and performed synthetic nanopore experiments for detection and real-time analysis of proteins and DNA methylation.

○ **Applied Biophysics Lab, UBC, Prof. Andre Marziali. (2005 - 2006)**

Developed a technology for parallel measurements of DNA hybridization using a lipid membrane with multiple nanopores, as a precursor for a synthetic DNA sequencer. Reduced the time required to obtain data by more than 100-fold to current gold standard. This work was the first to demonstrate multi-nanopore force spectroscopy measurements that could be used for single nucleotide polymorphism detection.

## Selected Awards and Scholarships

---

<i>Stanford Bio-X Travel Grant</i>	2018
<i>James S. McDonnell Foundation Postdoctoral Fellowship Award - \$200,000</i>	2014–2017
<i>Microscopy image winner: 2017 cover Nature Reviews Gastroenterology &amp; Hepatology journal</i>	2016
<i>Outstanding paper award: Center for Individualizing Medicine - Mayo Clinic</i>	2016
<i>Bruce and Elizabeth Dunlevie Bio-X Stanford Interdisciplinary Graduate Fellowship</i>	2011–2014
<i>Stanford Biosciences Office of Graduate Education Travel Grant</i>	2013
<i>Stanford Graduate Fellowship</i>	2008–2011
<i>Marine Biological Laboratory Physiology Summer Course Award</i>	2011
<i>Stanford Bio-X Student Travel Fellowship Award</i>	2009-2011,2013
<i>FEBS-EMBO Lecture Course Travel Award</i>	2009
<i>UBC Science Service Award, for contributions as the UBC Biophysics Student Society president and for starting a research seminar series for undergraduates (AIS)</i>	2008
<i>Arthur Crooker Prize – best experimental physics student</i>	2008
<i>Thomas and Evelyn Hebb Memorial Scholarship - academic excellence in physics</i>	2007
<i>Wesbrook Scholarship</i>	2007
<i>Trek Excellence Scholarship – top 5% of faculty of Science</i>	2007
<i>Charles and Jane Banks Scholarship</i>	2007
<i>UBC Science Scholar for outstanding academic achievement</i>	2006–2008
<i>NSERC summer undergraduate scholarship research award</i>	2007
<i>UBC Dean of Science Scholarship</i>	2006–2007
<i>UBC Dean’s Honor List: Faculty of Science</i>	2003–2008
<i>British Columbia Government Scholarship</i>	2004
<i>Larry Roberts Science One Memorial Scholarship</i>	2004

## Presentations

---

#### Invited Talks.....

31. “Dynamics of microbiota communities during physical perturbation.” American Physical Society Meeting. Boston, MA, USA. March 2019.
30. “Transient osmotic perturbation causes long-term alteration to the gut microbiota.” BC Children’s Hospital Research Institute Seminar. Vancouver, BC, Canada. November 2018.
29. “Following Your Gut.” Stanford Bio-X Fellows Symposium. Stanford, CA, USA. October 2018.
28. “Connecting gut microbiota biogeography to function.” Lake Arrowhead Microbial Genomics Conference. Lake Arrowhead, CA, USA. September 2018.
27. “Transient osmotic perturbation causes long-term alteration to the gut microbiota.” Canadian Society of Microbiologists Annual Conference. Winnipeg, MB, Canada. June 2018.
26. “Go with the flow: how osmotic diarrhea reshapes the gut microbiota.” Aspen Center for Physics. Aspen, CO, USA. June 2018.
25. “Mechanical Forces and Constraints Shape the Gut Microbiota.” School of Biomedical Engineering. University of British Columbia, BC, Canada. April 2018.
24. “Mechanical perturbations to the gut microbiota.” Department of Physics. University of Alberta, AB, Canada. March 2018.

23. "Defining microbiota and host resilience to physical perturbations: a multi-scale approach." Department of Microbiology and Immunology. University of British Columbia, BC, Canada. February 2018.
22. "Defining microbiota and host resilience to physical perturbations: a multi-scale approach." Department of Bioengineering. University of California Berkeley, CA, USA. February 2018.
21. "Defining microbiota and host resilience to physical perturbations: a multi-scale approach." Department of Microbiology, Immunology, & Molecular Genetics. University of California Los Angeles, CA, USA. February 2018.
20. "Microbiota and host resilience to physical perturbations." Department of Biology. University of Oregon, OR, USA. January 2018.
19. "Going with the flow: a multi-scale approach to the gut microbiota during osmotic disturbance." Institute of Bioengineering. EPFL, Lausanne, Switzerland. April 2017.
18. "Going with the flow: a multi-scale approach to the gut microbiota during osmotic disturbance." Biological Engineering Department. MIT, Boston, MA, USA. March 2017.
17. "Microbiota and host resilience to osmotic diarrhea." School of Animal & Comparative Biomedical Sciences Seminar. University of Arizona, Tucson, AZ, USA. January 2017.
16. "Going with the flow: the response of the gut microbiota to osmotic diarrhea." Mayo Clinic Individualizing Medicine Conference. Rochester, MN, USA. October 2016.
15. "Microbiota-mucus interaction during physical perturbations." FASEB - Microbial Glycobiology. West Palm Beach, FL, USA. June 2016.
14. "Real time dynamics of microbiota using microfluidics." Wellcome Trust and NIH/DHS Workshop – Unlocking the microbiome. London, UK. September 2015.
13. "Gut microbiota dynamics during physical perturbations." META Center Symposium, University of Oregon, OR, USA. July 2015.
12. "On growth and form – a bacterial perspective." Immunology and Microbiology Department Seminar, UBC, Vancouver, BC, Canada. October 2013.
11. "Building cell shape", Bio-X Fellows Symposium, Stanford University, Stanford, CA, USA. June 2013.
10. "On growth and form – a bacterial perspective." Biophysics Seminar, Simon Fraser University, Vancouver, BC, Canada. May 2013.

9. "From cell wall structure to morphogenesis" American Society for Microbiology Meeting, Denver, CO, USA. Young Investigator Presentation, May 2013.
8. "Spatial gradient of protein phosphorylation underlies replicative asymmetry in *Caulobacter crescentus*" American Society for Microbiology Meeting, New Orleans, LA, USA. May 2011.
7. "Modeling and engineering intracellular organization." Biophysics Seminar, UBC, Vancouver, BC, Canada. May 2010.
6. "The Beginning of the Ends: Localization of Lipids to Bacterial Poles." EMBO biomembranes conference, Cargese, Corsica, France. June 2009.
5. "MegaPixel Digital PCR for Non-Invasive Detection of Fetal Down's Syndrome." Inverclyde Down's Syndrome Support Group (IDSSG) Conference, Vancouver, BC, Canada. May 2008.
4. Valedictorian graduation speech. UBC, Vancouver, BC, Canada. May 2008.
3. "Mega-Pixel Digital PCR" Fluidigm (Company presentation), South San Francisco, CA, USA. September 2007.
2. "Detection of Epigenetic Sequence and Base Mutations Using Organic Nanopores.", Hangzhou Genomic Conference, Hangzhou, China. October 2006.
1. "Escape Kinetics of DNA through an alpha-hemolysin nanopore", Biophysics Seminar, UBC, Vancouver, BC, Canada. December 2005.

#### Other Talks.....

16. "A gut feeling." Stanford Postdoc Symposium. Stanford, CA, USA. October 2017.
15. "Transient osmotic perturbation causes long-term alteration to the gut microbiota." Stanford Advanced Seminar in Microbial Molecular Biology. Stanford, CA, USA. October 2017.
14. "Physical perturbations to the gut microbiota." JSMF-SFI Postdocs in Complexity Conference II. Santa Fe Institute, NM, USA. July 2017.
13. "Osmotic perturbations to the gut microbiota." Shriram Friday Seminar. Stanford, CA, USA. November 2016.
12. "Going with the flow: the response of the gut microbiota to osmotic diarrhea." Microbiology and Immunology Seminar. Stanford, CA, USA. October 2016.
11. "Talk nerdy to me: integrating microbiology with the physical sciences." Northern California Branch American Society for Microbiology, Pleasanton, CA, USA. March 2015.
10. "General principles of bacterial mechanics and cell-size determination revealed by cell wall synthesis perturbations." 2014 Mechanobiology Symposium, Stanford University, Stanford, CA, USA. November 2015.

9. "Building cell shape: lessons from *E. coli*." Microbiology and Immunology Seminar, Stanford University, Stanford, CA, USA. April 2014.
8. "Control of cell width in bacteria." Stanford Bioengineering retreat, Santa Cruz, CA, USA, October 2011.
7. "Spatial gradient of protein phosphorylation underlies replicative asymmetry in a bacterium." Microbiology Research Series, Stanford University, Stanford, CA, USA. March 2011.
6. "The role of spatial asymmetries in the development of the bacterium *Caulobacter crescentus*." American Physical Society Meeting, Portland, OR, USA. March 2010.
5. "Tradeoff between localization and expression levels in flagellar pole development of the bacterium *Caulobacter crescentus*." Molecular Biophysics Seminar, Stanford University, Stanford, CA, USA. November 2009.
4. "Mega-Pixel Digital PCR with Application to Non-invasive Detection of Fetal Down Syndrome." Thesis Defense, UBC, Vancouver, BC, Canada, April 2008.
3. "Mega-Pixel Digital PCR with Application to Non-invasive Detection of Fetal Down Syndrome." Multidisciplinary Undergraduate Research Conference, UBC, Vancouver, BC, Canada, March 2008.
2. "Electronic Detection of Functional Biomolecules", Frontiers in Biophysics Conference, Loon Lake, BC, Canada. October 2006.
1. "DNA, nanopores and the art of genome sequencing", Multidisciplinary Undergraduate Research Conference, UBC, Vancouver, BC, Canada. March 2006.
